

SafeSurfing Module 1

How to use the internet safely and How to protect my personal data?

Who we are

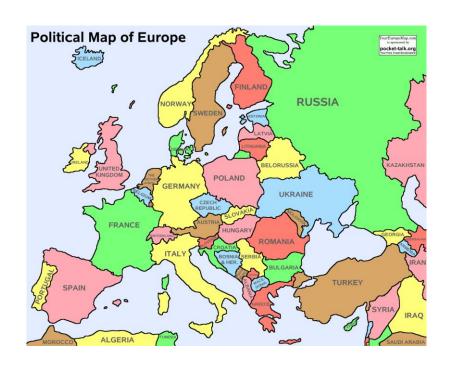

Carrie-Anne

Amy

The Safe Surfing project

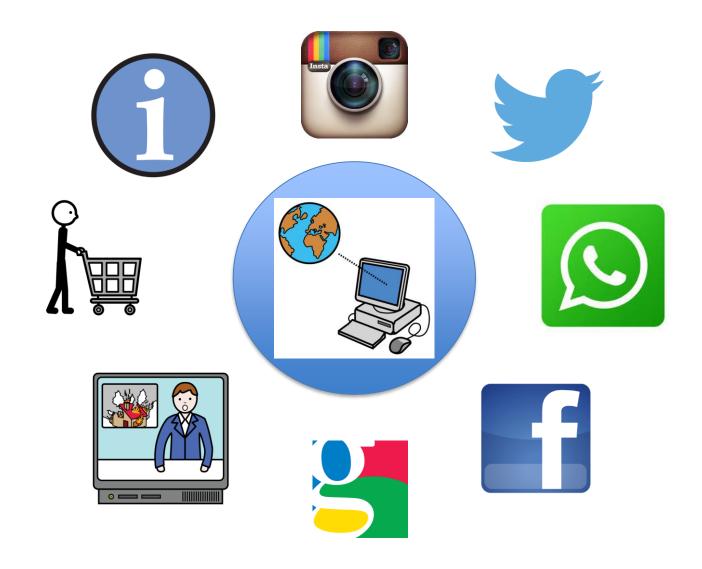

What is the Safe Surfing Project?

What are we Going to Learn Today?

- How to stay safe on the internet
- What is personal data
- How to protect your personal data
- Where to ask for help if things go wrong

We use the internet for many things

When you use the internet, you post *A LOT* of information about you online

Would you share this information with people you don't know?

Let's try! Is it personal data?

My name?

My Address?

My age?

Where I work?

My bank account number?

My email?

What Happens to my Personal Information?

The internet can be dangerous

Everything you share on the internet stays there forever

Spam

The information you share could be used by companies to send you emails you don't want, or show you adverts!

How can I Control my Information?

You wouldn't give your house keys to someone you don't know, so don't share your passwords either

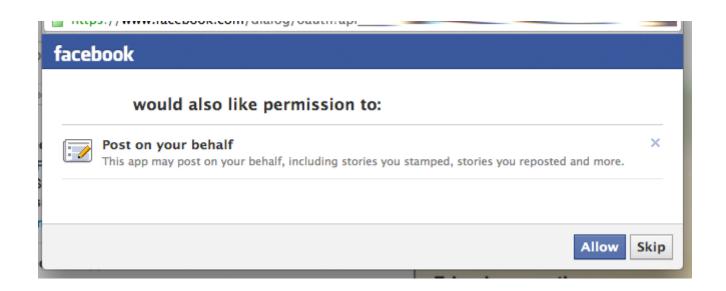

Always remember to log off any public computer you use, like the ones in libraries or community centers.

Do not install applications that ask to use your personal information, or post on social media for you.

Look out for the S

Don't give your personal information

Use Anti-Virus Software

Conditions of Use

What are My Rights?

You have the right to know what happens to your data

You can ask for information that you can understand

Right to be Forgotten

What Have we Learned Today?

- What is a personal data
- What happens to my personal data
- Why I should be careful when sharing my personal data
- How I can control my information
- What are my rights
- Where to ask for help

What Have we Learned Today?

Safe Surfing Session 2

Dangers of internet

Aims of today's session

Todays training is about the dangers in internet.

The main things we will be looking at are:

- ✓ What is public and what is private?
- ✓ What is a risky situation?
- ✓ How do you feel in a risky situation?
- ✓ People who you trust (pre-course exercise)
- ✓ Organisations that can help.
- ✓ Dangers from other people online.
- ✓ What I have learnt.

What is Public and What is Private?

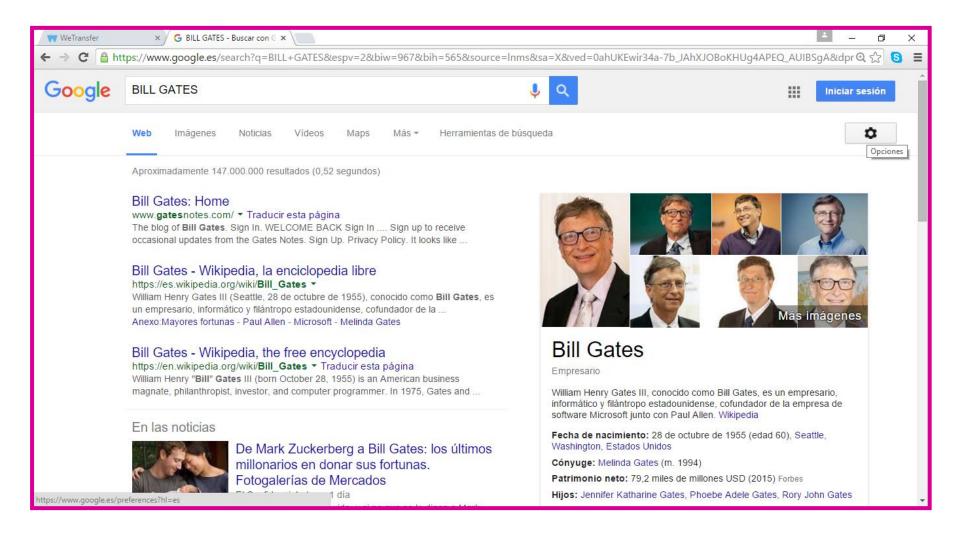

Public and Private

A park is a public location

Your bedroom is a private location

Public and Private

Lets Talk about Risky Situations Online

We are not always aware about risky situations we are facing.

It is also important to think about the consequences of our actions.

Lets look at some examples.

Which of Those Situations are Risky Situations?

Climbing

Your password is very common

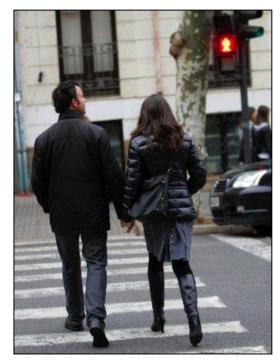

Texting with friends

Smoking when pregnant

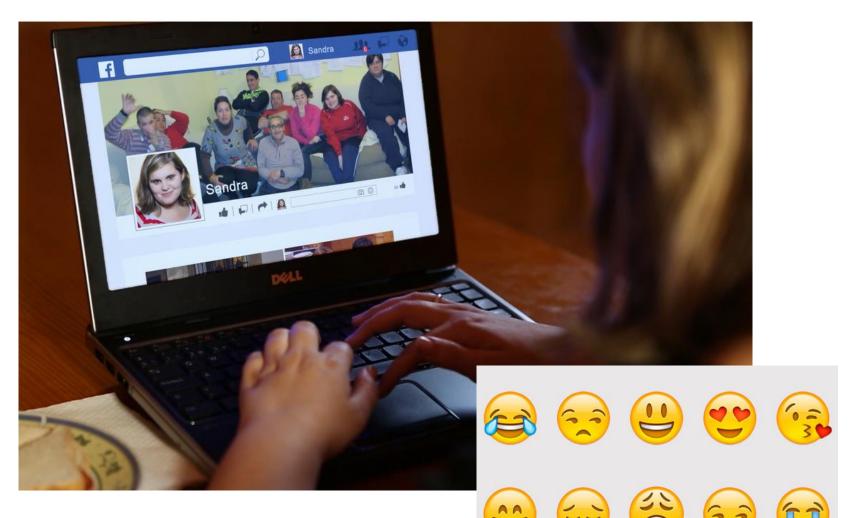

Cybersex with your boy friend or girlfriend

Crossing with red light

How Do I Feel in a Risky Situation?

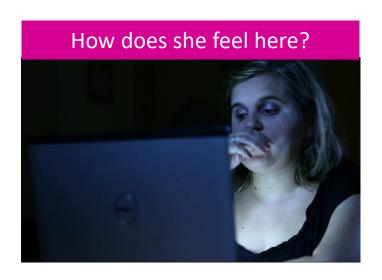

Your feelings can be signals of alarm

Sometimes, we are not aware about risky situations we are facing.

Because of the lack of information.

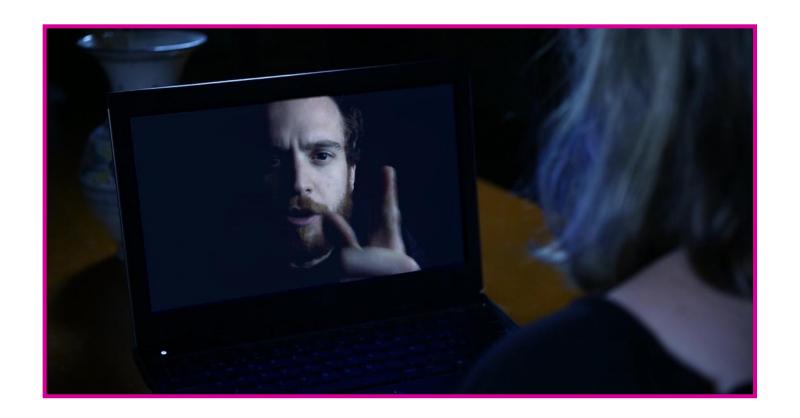

Because someone is cheating you.

What had happened between the first and the second picture?

If something similar happened to you, how would you feel?

that is a signal of alarm.

X If something makes us feel

that is a signal of alarm.

If something makes us feel

that is a signal of alarm.

If something makes us feel

that is a signal of alarm.

X If something makes us feel

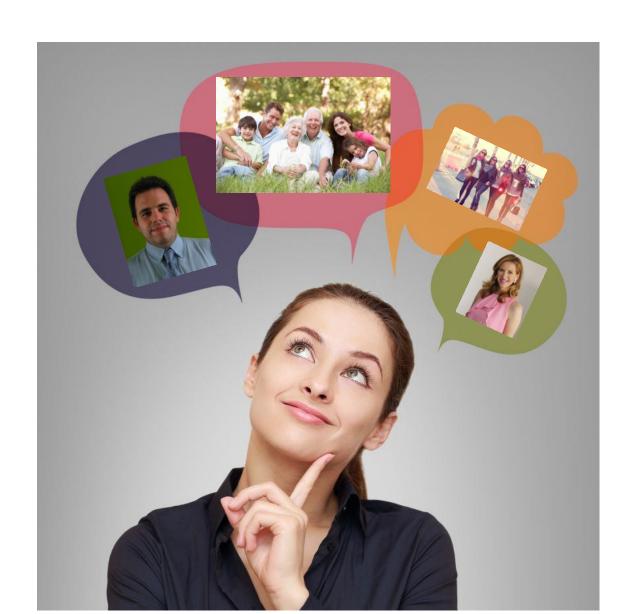

, that is a signal of alarm.

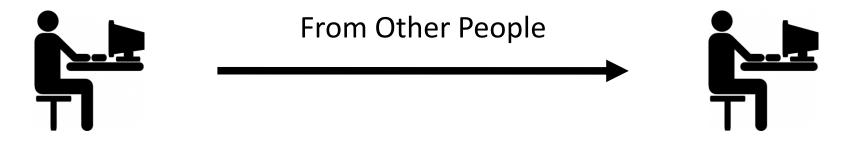

If any of these happen to you, it is advisable to ask for help from someone on whom you can rely.

People Who You Can Trust

Dangers or bullying from another person or people.

Dangers Other People

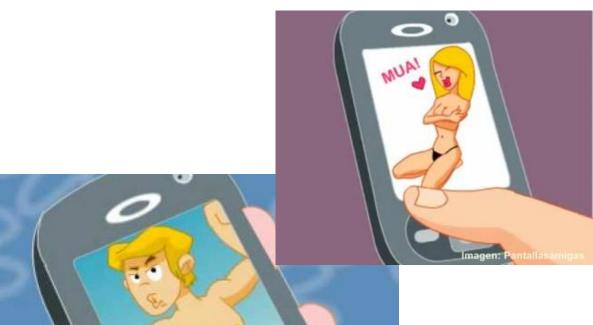

Dangers Other People

Sexting

Consent?

Conclusions of My Experience

What have I Learnt Today?

Finally... Let's build some tips together!

1.	••••••••••••••••••••••••••••••
2.	•••••••••••••••••••••••••••••••••••••••
3.	••••••••••••

Has anyone got any questions about any of these tips?

Thank you!

As always, please contact us if you have any questions about the internet!

And Remember...
Have Fun Online
But Always be Safe.
Better Safe than Sorry!

How to stay safe using the internet & App's

This project wants to help people with learning disabilities use the Internet safely.

There are lots of things you can do with mobile devices, (such as mobile phones, smartphones, tablets and i-Pads).

You can go on the Internet, you can share pictures and information on Social Networks, you can keep in touch with friends and you can download apps and online games

What Apps Do You Use?

You may find several apps on your tablet or mobile phone.

You may find others on the Internet.

Some apps are free but some you have to pay for.

Many apps require your personal data.

Facebook

Facebook allows you to keep in touch with your friends.

You can also post about what you are doing and where you are.

Instagram

Instagram is an app for pictures.

You can take pictures and post them online.

Whatsapp

Whatsapp is an app that is used for texting and chatting with contacts in our mobile phone or smartphone list.

Google Maps

Google Maps is an app that is useful to look for streets or places we do not know.

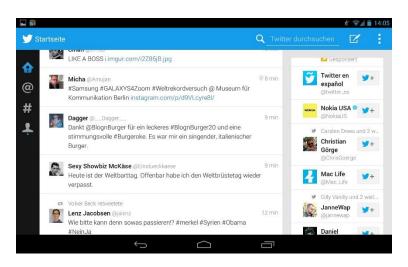

Twitter

Twitter allows you to post about what you are doing and pictures, like Facebook.

You can also "follow" other people to see what they are doing

YouTube

Is another way of sharing videos

When we take a video of ourself or of our friends and we upload it, we have to remember that other people can watch them.

Even people we don't know!

Some Questions

If we post a photo on Facebook, who is going to see it?

Is it good to post where we are?

Can the videos that we put on YouTube be seen on Facebook?

Risks

Even though being online can be really fun and useful we need to be aware of the dangers.

It is important to know how to be online safely.

Games

Many games can be downloaded for free.

For example Farmville or Candy Crush

Staying Safe

Do not give people your mobile phone, tablet or smartphone because they may read your personal data.

Use a code or a password to protect personal data on your mobile device.

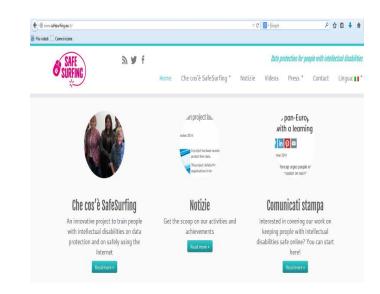

Dont give anyone you do not know your phone number. Be careful on what wifi connection you use.

Thank you!

In order to receive more information on this issues and to have a look at other videos, you can visit the website www.safesurfing.eu and if you have more questions you may get in touch with us by sending a message to

SafeSurfing Module 4

Facebook and Browser Safety

What are we going to Learn Today?

- What is private information
- Why You should protect it
- Logging off shared computers

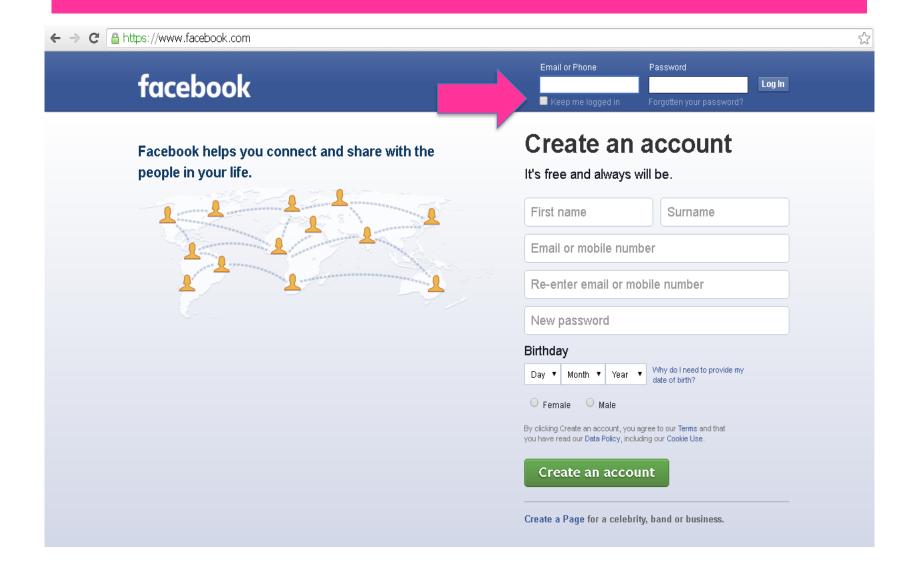

Facebook

Now we are going to look at Facebook and show you lots of helpful ways to stay safe and keep your personal data safe.

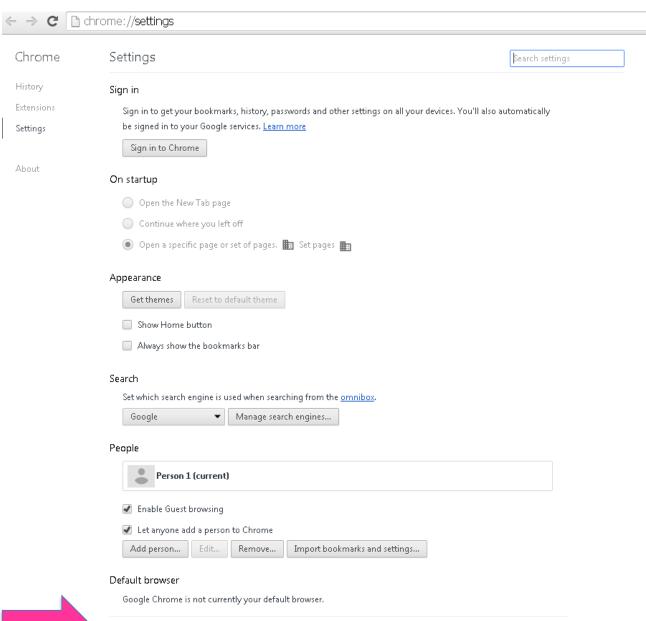

Saving Password and Staying Logged in the Browser

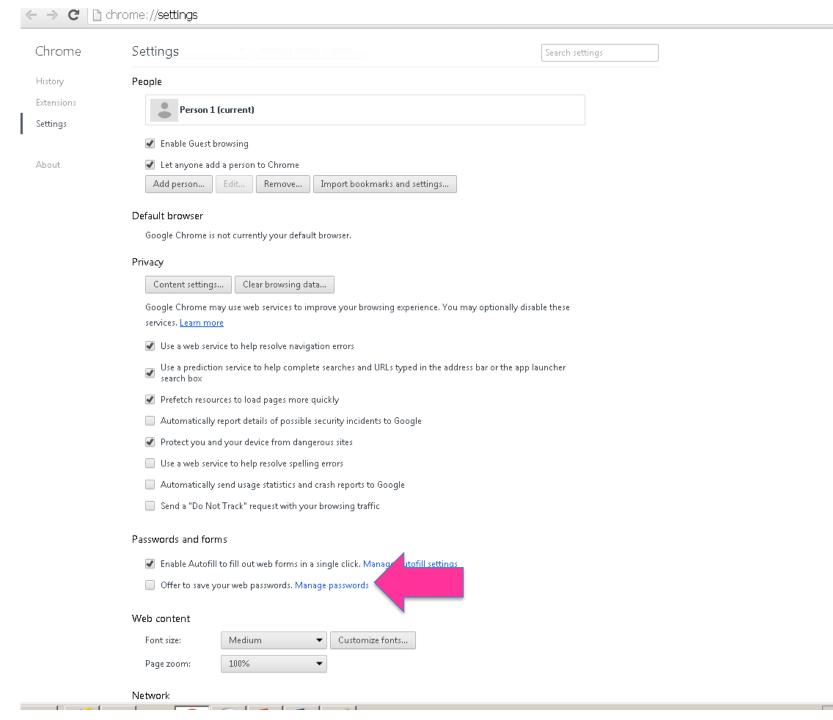

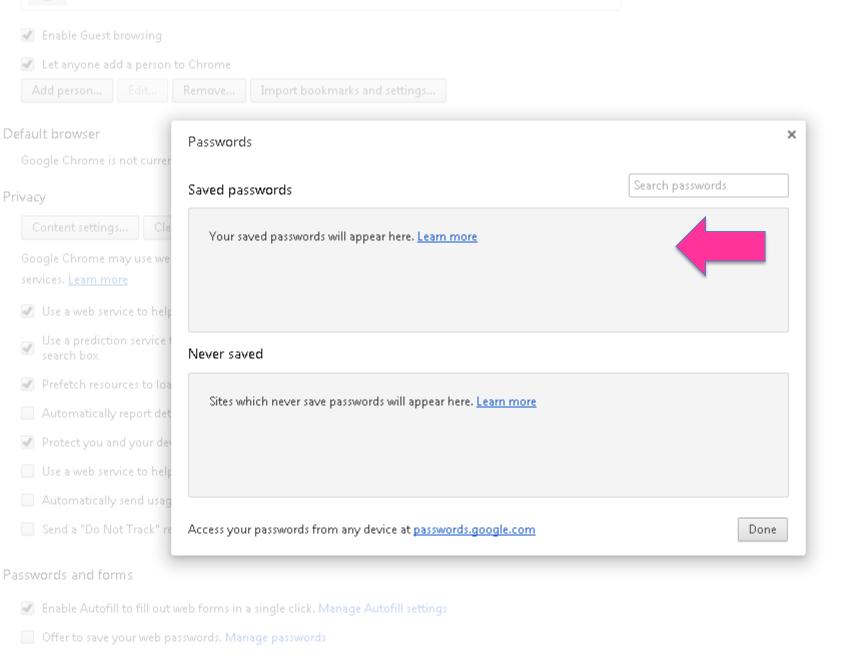

Deleting Password in the Browser

We look forward to seeing you for the next session

SafeSurfing Module 5

The Safe Surfing Project

Who we are

Carrie-Anne

Richard

Aims of Today's

To remind ourselves this is what we have learnt in the training so far, including:

- Why the internet can be great
- Why we need to be careful on the ir.
- · Who to share information with
- What information to share
- How to get help
- Final tips about how to be safe

Why the Internet can be Great!

Fill in petitions

Play Games

Watch funny videos

Stay in touch with family

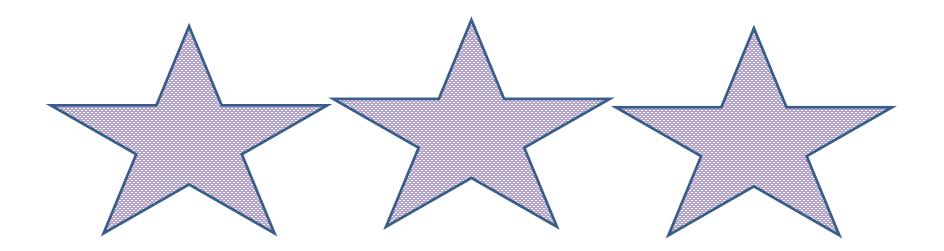

Online dating

Email complaints when I'm not happy

Make new friends

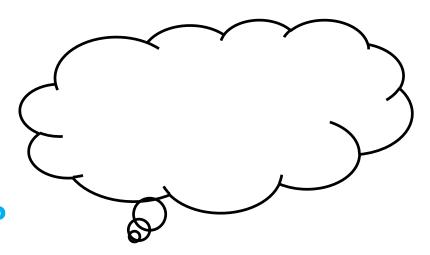

Why the internet can be great!

Exercise: Three stars and a wish

BUT, We do Need to be Careful on the Internet

Exercise: Three stars and a wish

What is your wish?

Who do you share your information with?

We need to think about:

Who we share our information w

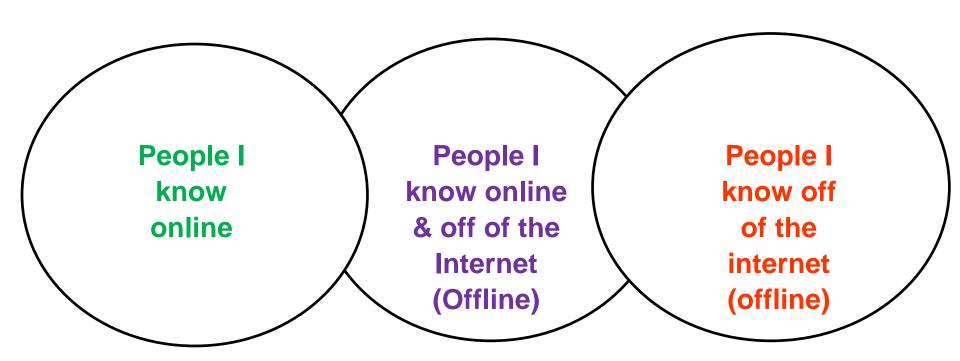

When we share it with them

Where we share it with them

Who do you share your information with?

Exercise: Online and Offline Friends

What Information Should you Share Online?

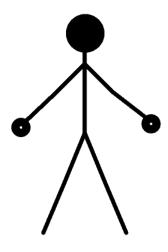

There are lots of *different types of information* about yourself

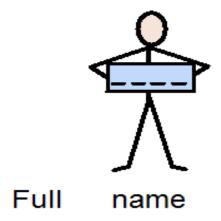

- Some is private information no one should know it apart from you and your close family or carer
- Some information can be shared with some people that you know well
- And some information is ok to share with anyone that you want to share it with

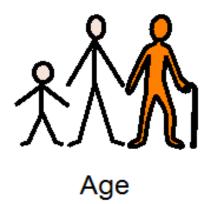

What Information Should you Share Online?

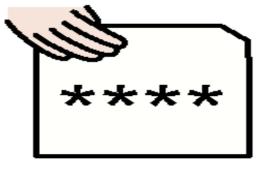

Exercise: Keep it Safe or Share it?

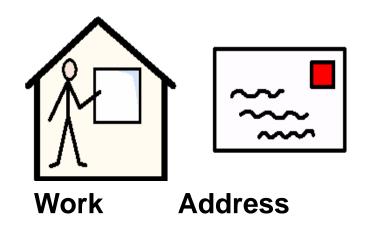

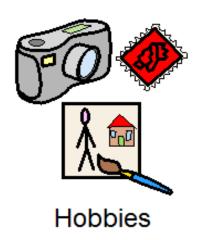

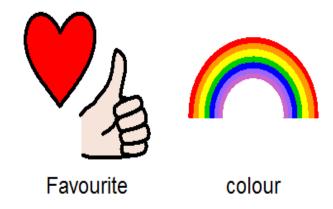

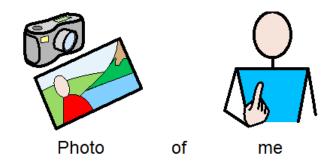

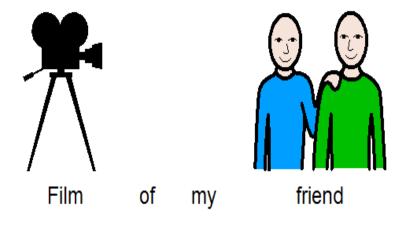

Password

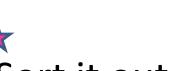

How to get help?

Do you?

Ignore it

Sort it out yourself

Ask someone for help

How to Get Help?

Correct!

But, who would you ask for help?

How to Get Help?

- Parent/Guardian
- Sibling
- Other family member (Uncle/Auntie/Cousin/Grandparents etc.)
- Friends
- Staff member/colleague
- Other trusted adult outside of school (like an adult who runs a club you attend)
- Police
- Helpline
- Website
- Using reporting buttons/tools on a site/service

How to Get Help?

We need to remember that if anything on the internet worries or upsets us, we must:

- Always tell someone
- Always report it
- Always block someone
- Always save the evidence

In the UK, the organisation that helps us with this is called the **Information Commissioners Office**.

They can be found at the website: <u>ico.org.uk/</u>

Finally, some Key Tips!

Amy and Dean's Key Tips:

The Tips

- 1. Look out for the S: on website addresses
- 2. Don't put your personal details on the internet
- Don't add people you don't know on social media and keep your profile secure
- 4. Beware of Trolls
- Beware of the link in emails from people you don't know

Has anyone got any questions about any of these tips?

Thank you!

As always, please contact us if you have any questions about the internet:

Carrie-Anne – CarrieAnne.Ferrie@Mencap.org.uk

Evaluation

Please complete the participation form on the link below to receive your certificate

http://www.safesurfing.eu/participation/

Please complete the evaluation - it helps us make the training better!

http://www.cafecurfing.eu/evaluation

And remember... Have fun online but always be safe!
